

**SP 7** Our refrigerated floral fixture at a classic height with full lighting. Configured as a 4 row fixture.

**Features:**

- Self-watering - flush and fill cycle on our programmed timer that will maximize floral life, reduce shrink and minimize labor.
- Automatic water level sensor - the water level is automatically replenished if needed due to hydration or evaporation.
- Consistent 36°F uniform air temperature. Cool display environment ensures long store life and long vase life in the home.
- High Humidity - 65% to 80%. Flowers require moist air as well so as not to dry out.
- 15° forward lean, locking vase collar to ensure your bouquets are displayed properly at all times.
